

BIFOLD DOOR (BOTTOM ROLL)

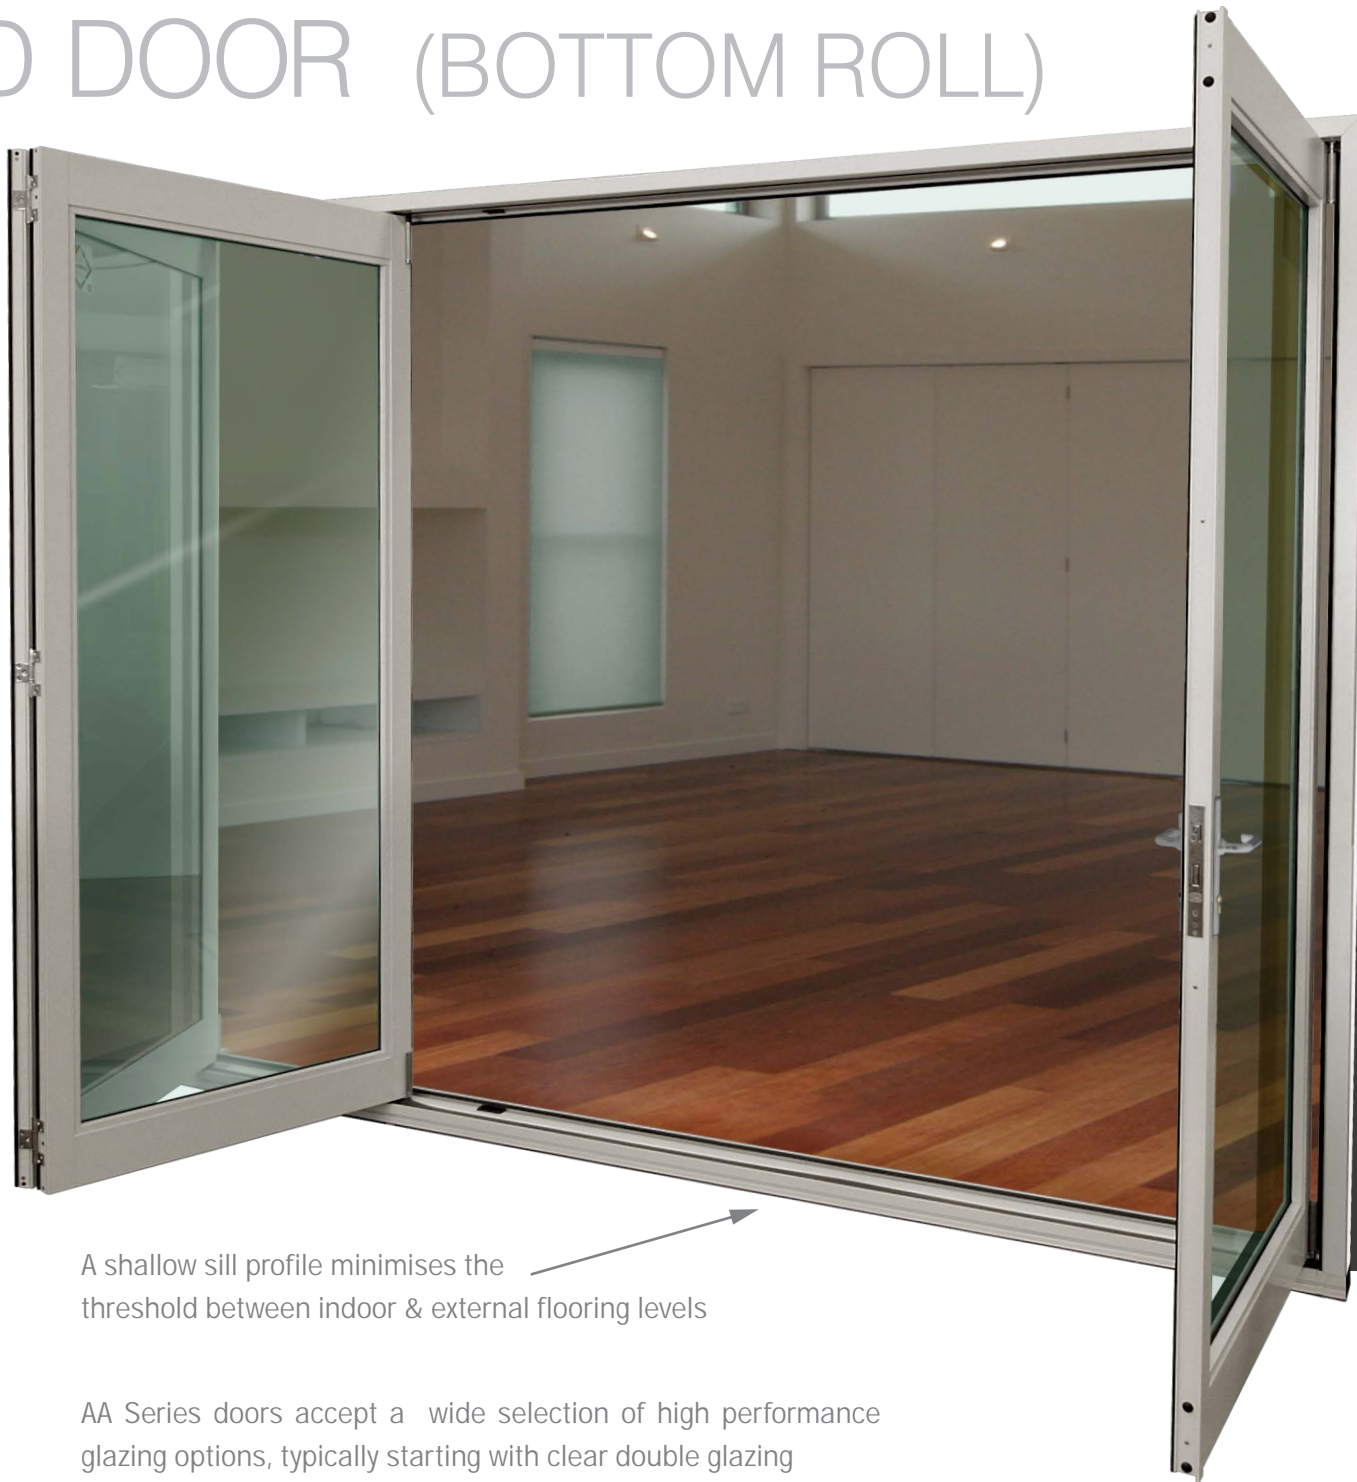

AA SERIES

'Summit' (L) or 'Aria' handles - in Black or Satin Chrome - are the standard options

Flush-bolts are fitted top & bottom on all fold away panels

Centor Architectural carriers ensure the smoothest of operation. With most weight bearing on the sill, overhead works are minimised

A clever silicone seal keeps the bottom carriers isolated from dirt & debris when in service

A shallow sill profile minimises the threshold between indoor & external flooring levels

AA Series doors accept a wide selection of high performance glazing options, typically starting with clear double glazing
